Actor Edit Validation

```php
public function edit($id)
{
    $actor = Actor::find($id);
    return view('actor.edit',compact('actor'));
}

/**
 * Update the specified resource in storage.
 *
 * @param  \Illuminate\Http\Request  $request
 * @param  int  $id
 * @return \Illuminate\Http\Response
 */
public function update(Request $request, $id)
{
    $rules = [
        'name' =>'required',
        'note'=>'required|alpha_num',
    ];
    $messages = [
        'required' => 'This :attribute field is required',
        'min' => 'masyadong maliit ang :attribute',
        'alpha' => 'pawang mga letra lamang',
        // 'name.required' => 'Anong pangalan mo?'
    ];

    $formData = $request->all();
    $validator = Validator::make($formData, $rules, $messages);
    if ($validator->passes()){
    $actor = Actor::find($id);

        if ($request->file('poster') != null){
            $poster=$request->file('poster');
            $file_name=$request->input('name').'.'.$poster->getClientOriginalExtension();
            $poster->move(public_path("image"),$file_name);
            $actor->image=$file_name;
        }
    $actor->name=$request->input('name');
    $actor->note=$request->input('note');
    // dd($actor);
    $actor->save();
    }
    return Redirect::to('actor')->with('success','Actor updated!');
}
```

Actor Store Validation

```php
public function store(Request $request)
{
    $rules = [
        'name' =>'required',
        'note'=>'required|alpha_num',
        'poster'=>'required',
    ];
    $messages = [
        'required' => 'This :attribute field is required',
        'min' => 'masyadong maliit ang :attribute',
        'alpha' => 'pawang mga letra lamang',
        'name.required' => 'Anong pangalan mo?'
    ];

    $formData = $request->All();
    $validator = Validator::make($formData, $rules, $messages);
    if ($validator->passes()){
        $poster=$request->file('poster');
        $file_name=$request->input('name').'.'.$poster->getClientOriginalExtension();
        $poster->move(public_path("image"),$file_name);

        $actor=new Actor;
        $actor->name=$request->input('name');
        $actor->note=$request->input('note');
        $actor->image=$file_name;
        $actor->save();

        return Redirect::to('actor')->with('success','New Album added!');
    }
    //return Redirect::route('customer.create')->withInput();
    return redirect()->back()->withInput()->withErrors($validator);
}
```
